BURRY PORT URBAN DISTRICT COUNCIL

Public Health Department,
Council Offices,
Brynymor House,
BURRY PORT.

Report of the Medical Officer of Health for the year 1965

To:-

The Chairman and Councillors of Burry Port Urban District Council.

There were no serious epidemics of infectious diseases in the area during the year. Live births at 87 exceeded the number of deaths (83) by 4. The maternal and infant mortality rates compared favourably with the national rates. Immunisation rates of infants were a little disappointing and it is to be hoped that these will improve during the coming year. I would like to thank the Chairman, Officials and Councillors for their help and kindness during the year in dealing with the problems that presented themselves.

E. H. Beynon Hopkins,

MEDICAL OFFICER OF HEALTH.

Annual Report of the Medical Officer of Health for the year 1965

INFECTIOUS DISEASES. The following notifications were received during the year:-

Measles:- 12 Whooping Cough:- 3 Dysentery:- 15

Food Poisoning. An outbreak involving 4 members of a family of 5 occurred towards the end of the year.

Initially 3 members were notified as Dysentery cases on 15th November, 1965, the fourth developing symptoms 9 to 10 days later.

Laboratory investigations isolated Salmonella liverpool from the stools of two of the cases.

No other cases were discovered within the area and it was not possible to discover the source of the infection.

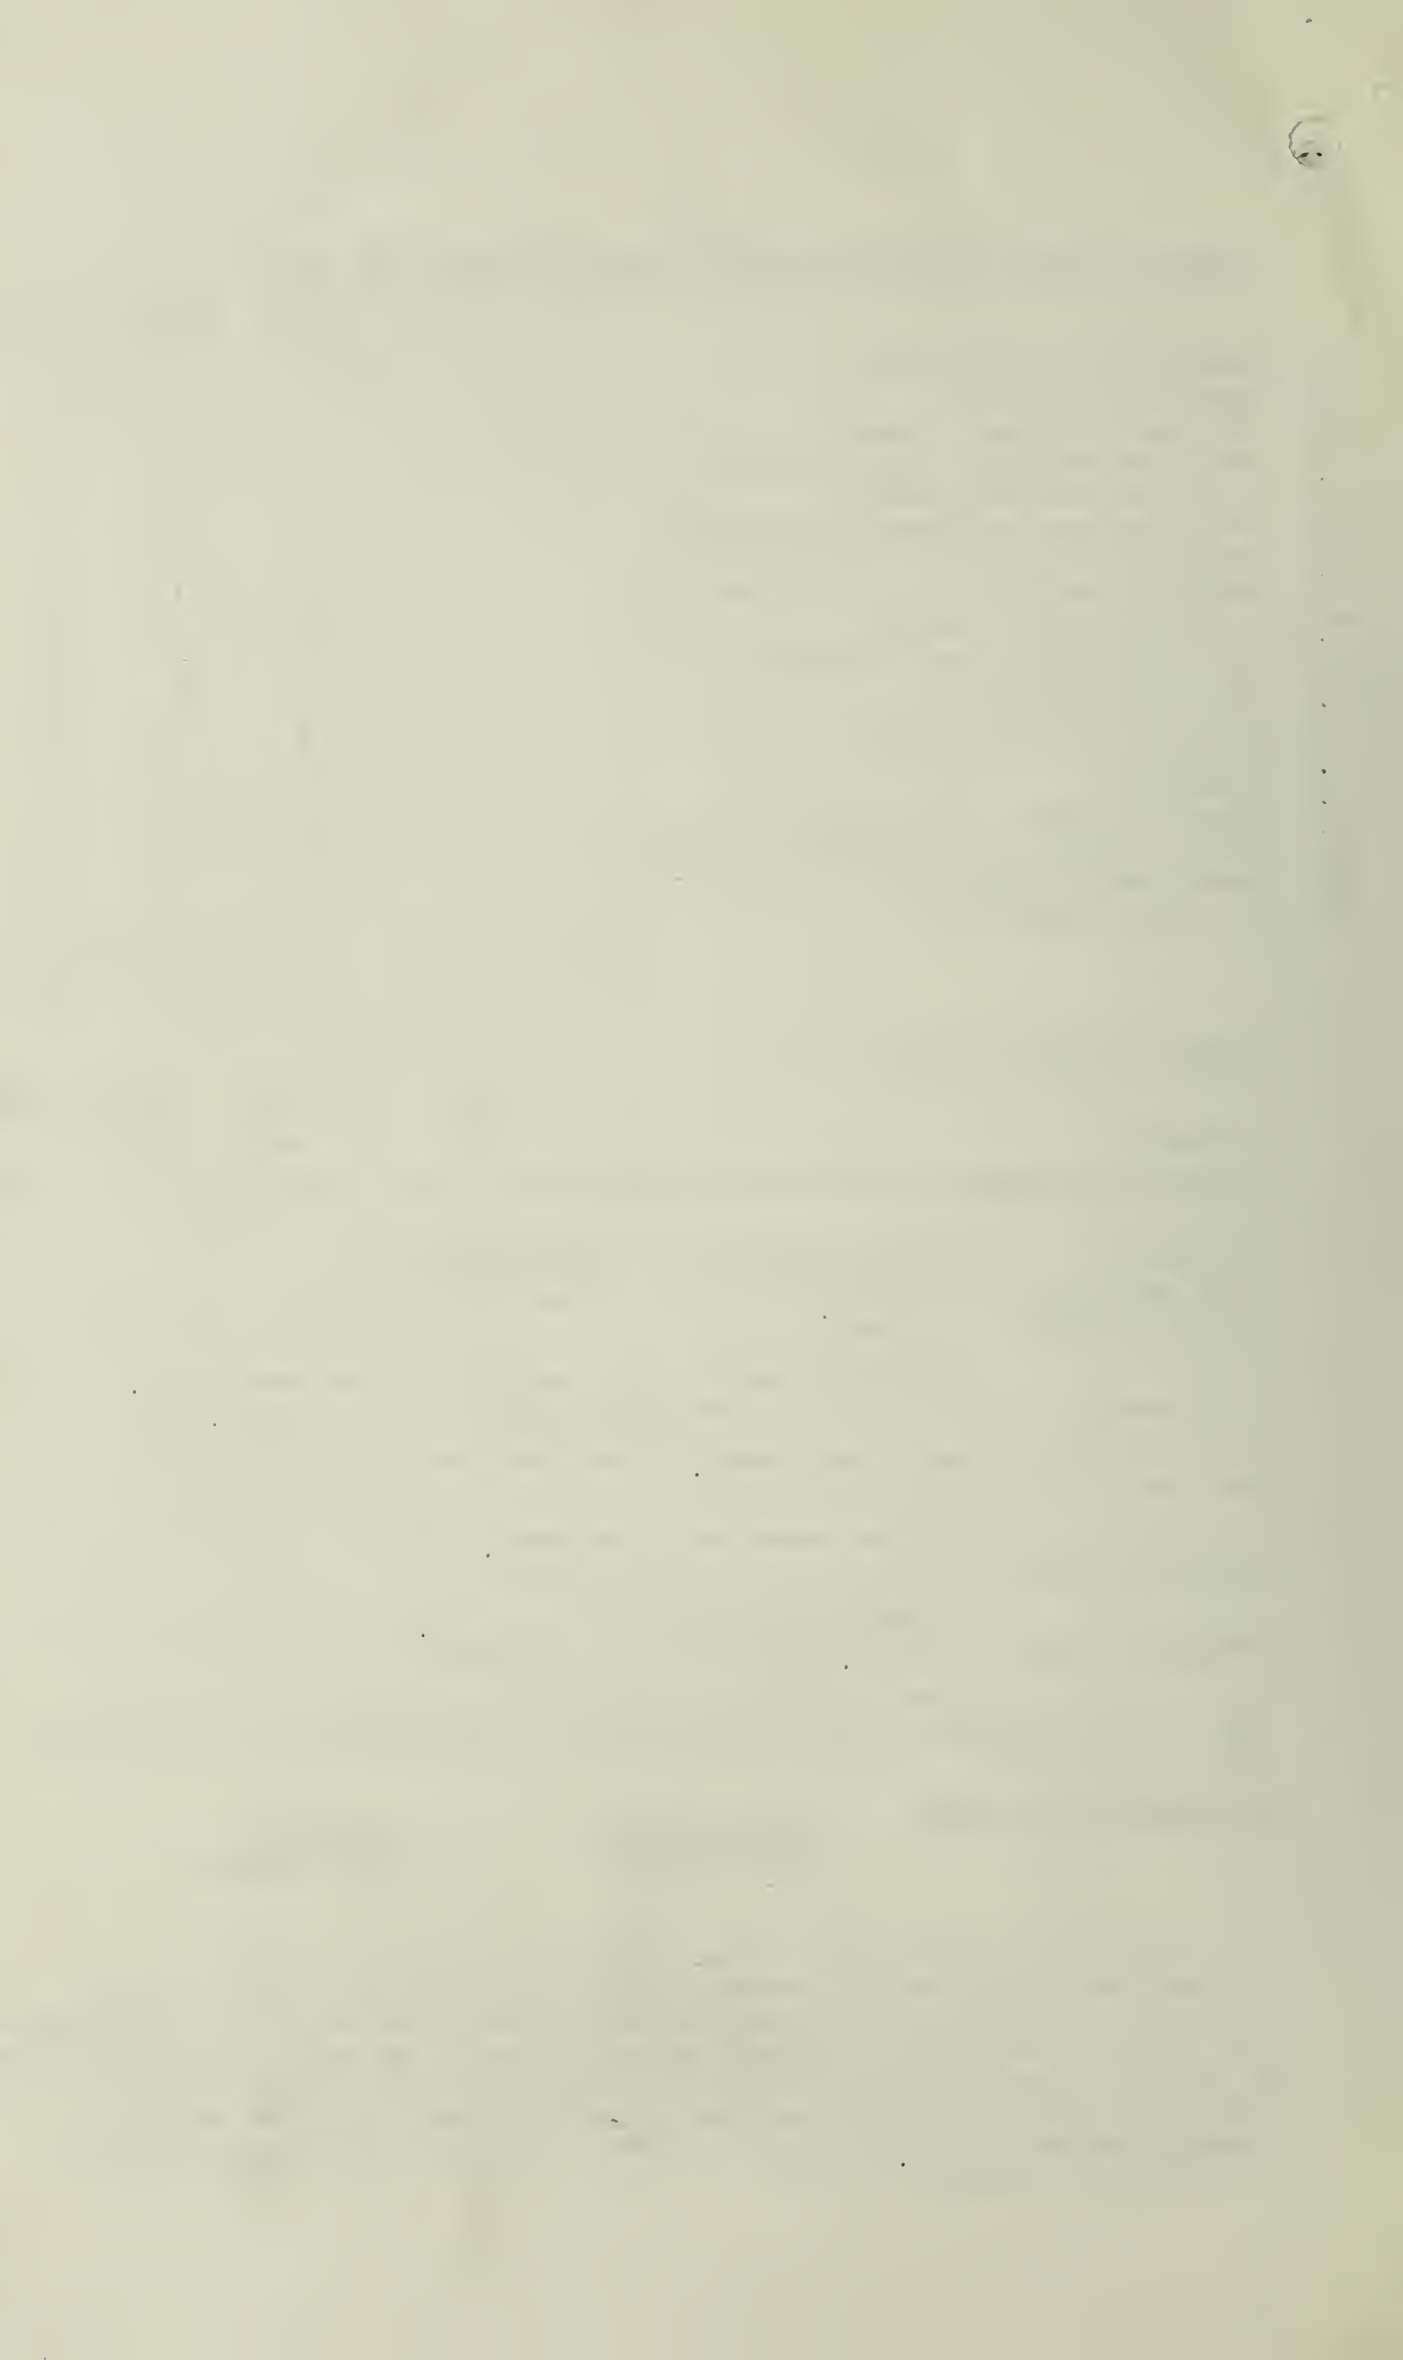

An elderly female member of the family remained positive for Salmonella liverpool after the cessation of symptoms.

Treatment failed to eradicate the infective organisms and the case was being kept under observation and investigation at the end of the year.

Experience in Wales and elsewhere continues to show the value of maintaining a high level of immunisation in the population against certain diseases. In particular those against diphtheria, whooping cough, poliomyelitis and tetanus. Vaccination against smallpox infection has also proved invaluable. It must be emphasised that where these diseases have been absent for many years, the prevention of a possibly serious epidemic depends on the percentage of susceptible persons in the population who have been immunised or vaccinated against these diseases.

MASS RADIOGRAPHY

The Mass Radiography Unit did not visit the area during the year. Facilities are available for Chest X-Ray daily at Singleton Park Hospital, Swansea and on Mondays, except for the month of August and Bank Holidays, at the Odeon Cinema grounds, Llanelli.

BLOOD TRANSFUSION SERVICE

Two sessions were held, for general public blood donors, at the Memorial Hall during the year. A total of 137 donations were received. A unit of the National Blood Transfusion Service also visited the Carmarthen Bay Power Station where a further 122 donations were received.

Regular sessions for the general public are held at the neighbouring town of Llanelli. Most people can donate blood to the "Blood Bank" and the amount of blood taken is quickly restored from the body's reserve which is replaced in a matter of days. With the everlasting and ever increasing need for blood, I appeal that, in future, more people will donate blood for this most worthy and needy cause.

NATIONAL ASSISTANCE ACT, 1948 - Section 47 (as amended 1951)

No action was deemed necessary under this section during the year, for the removal, to suitable premises, of persons in need of care and attention. That the power is available is often sufficient to persuade such persons to agree to be moved.

MENTAL HEALTH SERVICE

The County Council provides the service for the care and after care of people suffering from mental illness or subnormality and whole time mental welfare officers are employed for this work.

The District Welfare Officer is Mr. D. A. David,, Glen View, Gwendraeth Town, Kidwelly who is a duly authorised officer to take initial proceedings under the Mental Health Acts for the provision of care and treatment of mentally ill persons in the area.
